

Personal Disaster Recovery Plan

Time required: 30 minutes

Create a one-page document of a personal disaster recovery procedure for your home computer. Be sure to include what needs to be protected and why. Also include information about where your data backups are stored and how they can be retrieved. Does your DRP show that what you are doing to protect your assets is sufficient? Should any changes be made?

Keep in mind the 3-2-1 Backup Rule. 3 copies, 2 different types of media, 1 copy offsite.
